I am writing to express my interest in the Steuerberater (m/w/d) position at Taxtalente.de. Although my professional background is in software engineering rather than tax advisory, I bring strong technical skills and a digital-first working style that align well with the modern, technology-driven environment your partner firm offers.

Through my work as a full-stack developer, I have built and maintained scalable web applications using Laravel, Next.js, React, and Node.js. I am experienced with cloud platforms including AWS and Google Cloud, containerization with Docker, and Linux server management with Nginx and Apache. This technical foundation allows me to work efficiently with digital tools, automated workflows, and modern software systems.

One area that particularly interests me is the emphasis on digital processes and modern equipment in your partner firm. I have hands-on experience integrating third-party services, managing databases like MySQL and PostgreSQL, and implementing secure authentication and role-based access control. I am comfortable working with complex systems and maintaining high attention to detail.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am confident that my technical skills, careful working style, and openness to digital ways of working would allow me to contribute meaningfully to your partner firm. I have attached my CV for your review and would welcome the opportunity to discuss how my background could support your needs.

Sincerely,

Md Shahanur Islam Shagor
