I am writing to apply for the Steuerberater position in Renchen through Taxtalente.de. While my professional background is in software engineering rather than tax consulting, I bring a strong technical foundation that supports efficient, digital-first workflows and secure data management.

Through my professional experience as a Web Developer, I have built and maintained scalable web applications using Laravel, Next.js, and MySQL. I have implemented authentication systems, role-based access control, and secure payment integrations. My work has consistently focused on building reliable, well-structured systems that handle sensitive data securely.

One area that particularly interests me is the emphasis on digital processes and modern tools in your partner firm. I am experienced with Linux server administration, Docker containerization, and CI/CD pipelines, and I am comfortable working in environments where technology drives efficiency. I have also worked with PostgreSQL, Redis, and real-time communication systems, which support data integrity and operational transparency.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my technical skills could support the digital operations of your partner firm.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
