I am writing to express my interest in the Steuerberater position at Taxtalente.de for a partner firm in Fellbach. While my professional background is in software engineering, I bring a strong foundation in analytical thinking, structured problem-solving, and digital process management that aligns well with the responsibilities of this role.

Through my work as a full-stack developer, I have built and maintained complex systems that require careful attention to detail, data integrity, and efficient workflows. I have worked extensively with databases like MySQL and PostgreSQL, ensuring accurate data handling and reporting. These skills translate directly to tasks such as preparing annual financial statements and tax declarations, where precision and systematic review are essential.

I am comfortable working in a digital environment and have experience deploying and maintaining applications on Linux servers using Docker and CI/CD pipelines. I approach my work with a focus on accuracy, efficiency, and clear communication. I am used to collaborating with cross-functional teams and managing multiple responsibilities simultaneously.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my background in structured problem-solving and digital systems can contribute to your partner firm in Fellbach.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
