I am writing to express my interest in the Steuerberater position at Taxtalente.de. Although my professional background is in software engineering and AI, I bring a strong foundation in analytical thinking, data integrity, and process optimization that aligns well with the demands of tax advisory work.

My experience as a Full-Stack & AI Engineer has required me to work with complex, data-intensive systems where accuracy and attention to detail are critical. I have built and maintained applications that handle authentication, payment processing, and real-time data synchronization, all of which demand the same precision and compliance mindset required in tax consulting.

One area that particularly interests me is the opportunity to work with digital processes and modern tools. I am already comfortable with digital workflows, having deployed applications on cloud infrastructure, managed databases, and automated routine tasks. I am confident I can quickly adapt to the specific tax software and digital tools used by your partner firm.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills can contribute to your partner firm in Vilgertshofen.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
