I am writing to express my interest in joining the Government of Northwest Territories through the Various Positions listing. The opportunity to contribute to public service through technology is something I find genuinely meaningful, and I am eager to bring my software engineering experience to support the communities across the Northwest Territories.

My background is in full-stack web development, with four years of professional experience building and maintaining production applications. I have worked extensively with Laravel and Next.js, developing RESTful APIs, implementing authentication and role-based access control, and optimizing database performance with MySQL. I also have hands-on experience with real-time features using WebSockets and Socket.IO, and I am comfortable deploying and managing applications on Linux servers using Docker, Nginx, and CI/CD pipelines.

In previous roles, I delivered scalable web applications end to end, from backend architecture to responsive frontend interfaces. I have integrated third-party services such as payment gateways, social logins, and cloud storage, and I have worked on optimizing application performance through query tuning and caching strategies. One project that reflects this is the Multivendor E-commerce Management Ecosystem, where I built a Laravel backend with role-based access control, MySQL, and Firebase notifications, supporting multiple user roles across web and mobile platforms.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills can contribute to the GNWT team.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
