I am writing to apply for the Chat Support Specialist position at OnlineJobs.PH. Your software company's focus on delivering a great customer experience through live chat and email support aligns well with my background in technical communication and problem-solving.

Through my work as a full-stack and software engineer, I have developed strong written communication skills and the ability to explain technical concepts clearly to non-technical users. I am comfortable troubleshooting software issues, identifying root causes, and knowing when to escalate complex problems to the appropriate team members.

In previous professional experience, I worked closely with support and operations teams to document customer feedback and common issues. This helped improve product documentation and reduce repeat inquiries. I am accustomed to working independently in remote environments and maintaining reliable communication with team members across different time zones.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and look forward to discussing how I can contribute to your support team.
