I am writing to apply for the Template position at Pizza Pilgrims. While this role focuses on pizza-making rather than software development, I appreciate the company's commitment to quality, growth, and team culture.

My background is in full-stack web development, with 4 years of professional experience building scalable applications using Laravel, Next.js, React, and Node.js. I have designed and developed RESTful APIs, implemented secure authentication systems, and created responsive user interfaces with Tailwind CSS and TypeScript.

In my previous role at Explo-IT, I delivered production-ready web applications end to end, from backend architecture with Laravel to frontend implementation with Next.js. I optimized database queries, integrated payment gateways, and deployed applications on Linux servers using Docker and Nginx. I also built a multi-vendor e-commerce platform that manages complex marketplace operations across web and mobile.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
