I am writing to apply for the Netzwerkmanager (m/w/d) Photonik position at EurA AG. Your work as an innovation and financing consultancy supporting companies and research institutions from idea to market launch is genuinely interesting. The opportunity to build and manage innovation networks in the photonics sector aligns well with my technical background and interest in emerging technologies.

Through my software engineering experience, I have developed strong analytical and organizational skills that are directly relevant to this role. My work has involved identifying technology potential, structuring complex projects, and coordinating between different stakeholders to ensure successful delivery. I am comfortable analyzing market trends and translating technical possibilities into actionable project plans.

One area that particularly interests me is the intersection of research and practical application. In my academic and project work, I have focused on autonomous systems, AI engineering, and secure communications. This has given me hands-on experience with cutting-edge technologies and the ability to communicate effectively with both technical experts and non-technical partners. I am used to working in environments where innovation and collaboration are essential.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments. I am also actively learning German to better integrate into German-speaking professional settings.

I am confident that my combination of technical knowledge, analytical thinking, and collaborative approach would allow me to contribute meaningfully to EurA’s network management and innovation consulting activities. I have attached my CV for your review and would welcome the opportunity to discuss how my background aligns with your needs.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
