I am writing to apply for the Head of Business Applications & Platforms role at TecTake GmbH. Your focus on building a scalable, integrated system landscape for a growing e-commerce business aligns with my experience in full-stack development and platform architecture.

Through my professional work over the past several years, I have designed and built scalable web applications and platform architectures using Laravel, Next.js, Node.js, and MySQL. I have experience developing RESTful APIs, implementing authentication and role-based access control, and integrating third-party services such as payment gateways and cloud storage. I have also deployed and maintained applications on Linux servers using Docker, Nginx, and CI/CD pipelines, ensuring reliable and secure system operations.

One area that particularly interests me is the strategic use of AI and automation to create measurable business impact. I have built AI-powered features in production applications, including assistants trained with OpenAI models and automated workflows for data processing and document generation. I also have experience with real-time communication systems using WebSockets and Socket.IO, which supports the need for integrated, responsive platforms.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background can contribute to TecTake’s continued growth.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
