I am writing to apply for the Kundenberater fˆ…r Buchhaltungsautomatisierung position at Finmatics GmbH. Your mission to simplify accounting through AI-driven automation resonates with my own focus on building practical, intelligent systems that reduce manual work and improve efficiency.

Through my professional experience as a full-stack developer, I have built and deployed web applications using Laravel, Next.js, and React, with a strong emphasis on authentication, role-based access control, and real-time data processing. I have also integrated AI-powered features into production systems, including OpenAI-based assistants and automated workflows, which directly relates to the kind of automation your platform delivers to accounting professionals.

One area that particularly interests me is the customer-facing aspect of this role. In my previous work, I regularly collaborated with stakeholders to understand their requirements, configure software to meet their needs, and provide ongoing support. I am comfortable coordinating across teams, gathering feedback, and ensuring that technical solutions align with real business processes.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background can contribute to Finmatics' success. Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
