I am writing to apply for the Senior IT Consultant - PLM & CAD Systems position at CONCAPE. The role's focus on managing and advancing CAD, PLM, and CAM applications within an international industrial environment is particularly interesting to me.

While my direct experience is not in CAD/PLM systems specifically, I bring strong technical foundations in software engineering, system administration, and application lifecycle management. I have experience taking ownership of IT systems, analyzing business requirements, and coordinating with internal teams and external partners to plan, test, and deploy system changes. My background includes managing upgrades, conducting integration tests, and ensuring smooth rollouts.

In my professional experience as a Web Developer, I was responsible for the full lifecycle of web applications. This included system ownership, requirement analysis, release management, and coordinating with stakeholders across different departments. I am comfortable working with complex processes, creating technical documentation, and communicating clearly with both technical and non-technical audiences.

I also have hands-on experience with Linux server administration, Docker, Nginx, and CI/CD pipelines. These skills support system reliability, deployment automation, and infrastructure management. I am confident I can quickly learn CAD/PLM-specific tools like Creo, CATIA, or Windchill and apply my system-level thinking to drive improvements.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background can contribute to CONCAPE's continued success.

Sincerely,

Md Shahanur Islam Shagor
