I am writing to apply for the Technischer Einkˆufer Stahlbau position at AS-Talentbridge. While my professional background is in software engineering rather than traditional procurement, I bring a strong analytical mindset, structured approach to problem-solving, and experience working across international teams that aligns well with the responsibilities of this role.

Through my work as a full-stack developer, I have developed a methodical approach to analyzing complex systems, identifying cost-saving opportunities, and optimizing processes. I have experience working with data analysis, market research, and building tools that support strategic decision-making. These skills translate directly to procurement tasks such as cost analysis, supplier evaluation, and supply chain risk assessment.

I have worked extensively with international teams and stakeholders, which has given me strong cross-cultural communication skills and the ability to negotiate effectively across different business environments. I am fluent in English and Bengali, have working knowledge of German and Russian, and am comfortable collaborating with partners from diverse backgrounds.

One area that particularly interests me is the analytical and strategic nature of procurement work. I enjoy breaking down complex problems, evaluating multiple variables, and making data-driven decisions. My experience in software development has trained me to think systematically, document processes clearly, and work independently while maintaining alignment with broader team goals.

I am eager to bring my analytical abilities, international experience, and structured working style to AS-Talentbridge. I have attached my CV for your review and would welcome the opportunity to discuss how my background can contribute to your team.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
