I am writing to apply for the Freelance Bookkeeper & Finance Coordinator position at LevelUp English. The combination of financial administration with a focus on automation and smarter workflows makes this role particularly interesting to me.

Through my work on an AI-powered financial application, I developed a system that automates financial workflows, including generating PDF term sheets from Google Sheets data and processing voice messages via AWS Transcribe. This project required me to build secure APIs using Express, TypeScript, and MongoDB, and integrate third-party services like OpenAI and AWS SES. The experience taught me how to streamline processes, reduce manual administration, and maintain accurate financial records.

I am comfortable taking ownership of day-to-day financial administration and acting as a bridge between internal systems and external advisors. My background in building full-stack applications has given me a strong foundation in organizing data, categorizing transactions, and ensuring information is accurate and easy to access.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am interested in helping LevelUp English build a modern and scalable finance function. I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to your team.

Sincerely,

Md Shahanur Islam Shagor
