I am writing to apply for the Produktmanager position at bedrop. Your company's trajectory as a growing e-commerce business with established products is impressive, and I am interested in contributing to the continued development and optimization of your product portfolio.

Through my work as a full-stack developer, I have gained practical experience in the e-commerce domain. I have built and maintained multi-vendor marketplace platforms, managed product data, and coordinated with design and logistics teams to ensure smooth product delivery. This has given me a solid understanding of how products move from concept to market, and how cross-functional collaboration drives success.

One area that particularly interests me is the analytical side of product management. I am comfortable working with data, monitoring product performance, and identifying areas for improvement. My technical background allows me to communicate effectively with engineering teams while also understanding market needs and customer behavior.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background in e-commerce and product development can support bedrop's growth.

Sincerely,

Md Shahanur Islam Shagor
