I am writing to apply for the Werkstudent:in / Intern:in Online Marketing & Paid Ads position at Logic Joe GmbH. Your approach of combining tech, design, UX, and marketing under one roof, with AI as a standard tool rather than a buzzword, is exactly the kind of environment where I want to grow.

Through hands-on project development, I have built AI-powered features into full-stack applications. For example, I developed an AI-powered financial app where I integrated OpenAI assistants trained on custom datasets, used AWS Transcribe for voice-to-text conversion, and automated PDF generation and email delivery via AWS SES. I also built an AI-powered real estate platform using the Replicate API for image processing and OpenAI for intelligent property insights, with role-based authentication, subscription plans, and Stripe payment integration.

In previous professional experience as a Web Developer, I designed and built scalable web applications using Laravel and Next.js, integrated RESTful APIs, implemented authentication and role-based access control, and optimized database performance. I also created responsive, SEO-friendly UIs with Tailwind CSS and delivered real-time features using WebSockets. This technical foundation allows me to contribute effectively to digital product development and landing page creation.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am eager to bring my AI experience and web development skills to your team, supporting paid campaigns and product development with a data-driven, user-focused approach. I have attached my CV for your review and look forward to the opportunity to discuss how I can contribute to Logic Joe GmbH.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
