I am writing to express my interest in the test position at Fluidstack. Your focus on delivering massive-scale compute infrastructure for AI is exactly the kind of ambitious, real-world challenge I want to be part of.

My background spans full-stack web development and AI engineering, with hands-on experience building and deploying production systems. I have worked with Docker, Linux servers, Nginx, Apache, and cloud platforms including AWS and Google Cloud to set up reliable, scalable infrastructure. I am comfortable working across the stack, from backend APIs to frontend interfaces, and I prioritize clean architecture and maintainable code.

In my professional experience as a Web Developer, I deployed applications on Linux servers, configured Nginx and Apache, containerized services with Docker, and implemented CI/CD pipelines for smooth releases. I also worked with monitoring tools and ensured system reliability through proper configuration and testing. This practical infrastructure experience aligns well with Fluidstack's need for engineers who understand both software and the systems it runs on.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and welcome the opportunity to discuss how I can contribute to Fluidstack's mission.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
