I am writing to apply for the Illustrator position at Odixcity Consulting. After reviewing the job description, I understand you are seeking a highly skilled illustrator for a full-time or contract role.

My professional background is in full-stack web development and AI engineering, with over four years of experience building web applications using Laravel, Next.js, React, and Node.js. I have also worked on AI-powered systems, real-time communication platforms, and autonomous systems research. However, I do not have professional experience or formal training as an illustrator.

I want to be transparent about this mismatch. My skills and experience are in software engineering, not in illustration or graphic design. I would not want to misrepresent my qualifications for this role.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

Thank you for considering my application. I have attached my CV for your review and welcome the opportunity to discuss how my background might align with other roles at Odixcity Consulting.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
