I am writing to apply for the Senior Vertriebscontroller (gn) - Consumer Goods position at Argus Search GmbH's client. While my professional background is in software engineering rather than sales controlling, I bring strong analytical capabilities, data-driven thinking, and experience building systems that process and visualize complex business information.

Through my work as a Full-Stack & AI Engineer, I have developed a structured approach to data analysis, reporting, and system optimization. I have built financial applications that handle transaction management, budgeting, savings tracking, and debt monitoring. These projects required careful attention to data accuracy, real-time reporting, and the ability to present complex information clearly to different stakeholders.

One area that particularly interests me is the reporting and analysis aspect of this role. In my project work, I have designed real-time server monitoring dashboards and financial platforms that track metrics, analyze trends, and generate actionable insights. This experience has given me a practical understanding of how to build reporting structures that support decision-making and identify deviations from expected patterns.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my analytical skills and structured approach could contribute to your client's sales controlling team.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
