I am writing to apply for the Junior Projektmanager position at Spectos GmbH. The opportunity to support logistics optimization projects in an international tech environment aligns well with my background in project coordination and data-driven work.

Spectos GmbH operates at the intersection of technology and logistics, helping optimize mail and parcel operations for clients across multiple markets. What stands out to me is the combination of hands-on project management with data analysis and quality control, which matches the structured, results-oriented approach I have developed through my work.

Through my professional experience as a Web Developer, I have been responsible for managing project timelines, preparing documentation, coordinating with stakeholders, and ensuring deliverables meet quality standards. I regularly analyzed performance data, prepared reports, and presented findings in a way that was clear and actionable for both technical and non-technical audiences.

A relevant example is my work on the Multivendor E-commerce Management Ecosystem, where I coordinated across multiple teams, tracked project milestones from kick-off to delivery, and maintained clear communication with clients and internal stakeholders. This experience taught me how to manage competing priorities while keeping projects on schedule and within scope.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments. I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to Spectos GmbH.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
