I am writing to apply for the Datenerfasser:in position at Wirth Vermittlungen. Your focus on helping households reduce monthly costs through careful data management and client support is a practical service that I find meaningful.

Through my work as a software engineer, I have developed a disciplined approach to handling data accurately and consistently. I have worked extensively with databases such as MySQL and PostgreSQL, where maintaining clean, up-to-date records was essential. This experience has trained me to process information carefully and spot inconsistencies before they become problems.

One area that particularly interests me is the structured nature of data entry and master data updates. In previous projects, I managed large datasets, performed regular updates, and ensured that information remained accurate over time. I am comfortable working independently on repetitive tasks while maintaining a high level of concentration and attention to detail.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my careful, structured approach to data work can contribute to your team.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
