I am writing to apply for the Projektleiter SHK/TGA position at Maier Heiztechnik GmbH. Although my professional background is in software engineering rather than HVAC systems, I bring strong project management, coordination, and documentation skills that are directly relevant to this role.

Through my work as a Web Developer, I have independently planned, executed, and delivered multiple full-stack projects from concept to deployment. This included coordinating with designers, backend engineers, and stakeholders, maintaining detailed documentation, and ensuring that each project met its requirements on schedule. I am comfortable taking full ownership of project workflows and adapting to changing priorities.

One area that particularly interests me is the opportunity to apply my structured approach to project leadership in a technical field. I am used to reading and interpreting technical specifications, breaking down complex tasks into manageable steps, and communicating progress clearly to both technical and non-technical team members. I am confident I can quickly learn the specific requirements of SHK/TGA projects.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my project management experience can contribute to Maier Heiztechnik GmbH.

Sincerely,

Md Shahanur Islam Shagor
