I am writing to apply for the Werkstudent:in Founder's Associate (m/w/d) - Internal Projects & Strategy position at VT Netzwelt GmbH. What stands out to me is the opportunity to work directly with the CEO on internal strategic initiatives, combining technical execution with organizational thinking in a digital product agency that builds scalable platforms and startups.

Through my work as a Full-Stack and AI Engineer, I have developed strong problem-solving skills and a practical approach to building tools that improve internal workflows. I have hands-on experience with AI-gestˆ…tzte Prozessoptimierung, having integrated OpenAI and Replicate APIs into full-stack applications to automate tasks, process data intelligently, and deliver real-time insights. I am comfortable scouting new AI tools, testing them, and implementing them where they add measurable value.

A relevant example is an AI-powered financial application I developed, where I built intelligent assistants using the latest GPT models, implemented voice-to-text processing via AWS Transcribe, and automated PDF generation and email delivery. This project required rapid prototyping, independent ownership of sub-systems, and close coordination with stakeholders to align technical decisions with business goals. I also built a real-time server health monitoring dashboard using Socket.IO and Docker, which involved designing a system from scratch and deploying it in a production environment.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am eager to bring my technical background, entrepreneurial mindset, and ability to drive internal projects from concept to completion to VT Netzwelt. I have attached my CV for your review and look forward to the possibility of contributing to your team.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
