I am writing to apply for the Werkstudent Produktmanagement position at VT Netzwelt GmbH. Your focus on digital product development, startup building, and scalable platforms closely matches my own experience and interests.

Through my work as a full-stack developer, I have built and shipped real digital products from concept to deployment. I have experience working across the entire product lifecycle, from ideation and prototyping to implementation and launch. This includes building scalable web applications with Laravel, Next.js, React, and Node.js, integrating REST APIs, authentication systems, and payment gateways, and deploying on Linux servers with Docker and CI/CD pipelines.

One area that particularly interests me is AI and technology scouting. I have actively integrated AI tools into projects, including OpenAI and Replicate APIs, for features like intelligent assistants and image processing. I enjoy exploring new technologies, testing their practical applications, and finding ways to improve existing workflows.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to your team.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
