I am writing to apply for the Medical Scribe position at Angel City VA Recruitment. Although my professional background is in software engineering, I have developed strong skills in accurate data handling, documentation, and working with complex information systems that are directly relevant to this role.

In my previous work as a web developer, I managed detailed data entry, maintained organized records, and ensured high accuracy when processing information. I am comfortable working independently in a remote environment and can quickly learn new tools and workflows.

I am a quick learner with strong attention to detail. I can adapt to medical terminology and documentation standards efficiently. My experience with digital tools and systems means I can navigate electronic health records and other software with ease.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my skills can support your team.

Sincerely,

Md Shahanur Islam Shagor
