I am writing to apply for the Student Success Advisor Evenings position at Walden University. Walden's mission to support adult learners in achieving their academic goals and making a greater impact in their professions and communities resonates with me. I appreciate the focus on providing personalized guidance to a diverse, online student body.

Through my work as a web developer, I have developed strong problem-solving and time management skills while managing multiple projects and priorities simultaneously. I am comfortable working independently and in team environments, adapting quickly to changing situations. My technical background gives me a solid familiarity with online learning platforms and internet technology, which I understand is a plus for this role.

One area that particularly interests me is the proactive outreach to students who may be at risk. In my previous roles, I have consistently taken initiative to identify potential issues early and work toward effective resolutions. I am skilled at connecting with people from diverse backgrounds and building rapport, which I believe is essential for guiding students through their educational journey.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to student success at Walden University. Thank you for your consideration.

Sincerely,

Md Shahanur Islam Shagor
