I am writing to apply for the Strategic Business Development Manager â Port Solutions position at OceanScore Madeira, LDA. Your focus on using emissions data to drive environmental transparency and incentive design in the port ecosystem is a compelling mission, and I am interested in contributing to your growth in this segment.

My background is in software engineering and AI, where I have developed a strong ability to think in systems and understand how regulation, governance, incentives, and data interact within complex environments. This systems-oriented mindset is directly applicable to the port ecosystem, where you need someone who can translate port needs into product developments and strategic opportunities.

In my professional experience as a Web Developer, I have worked closely with product and data teams to shape solutions, built and maintained stakeholder relationships, and managed projects from initial discussion through to delivery. I am comfortable moving from high-level strategic conversations to concrete partnership development, and I have a track record of identifying opportunities and advancing them independently.

One area that particularly interests me is how vessel emissions data can inform environmental policies and differentiated port dues. While my direct experience is in technology rather than maritime, I have a solid understanding of data integrity, real-time systems, and secure communication protocols, which are foundational to building trusted environmental intelligence platforms. I am confident I can quickly develop the domain-specific knowledge needed to act as a trusted discussion partner for port authorities.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills in systems thinking, partnership development, and data-driven strategy can support OceanScore’s growth in the port segment.

Sincerely,

Md Shahanur Islam Shagor
