I am writing to express my interest in the Finance Specialist (m/w/d) fˆ…r Buchhaltung & Controlling position at Therapium Group GmbH. Your growing physiotherapy group in Berlin is building the backoffice structures that will support your expansion, and I find this stage of organizational development particularly interesting.

My background is in software engineering, where I have spent over four years building full-stack web applications and automation systems. While this is not a traditional finance role, the core requirements align well with my experience: structured data management, process automation, careful handling of sensitive information, and independent work across multiple systems and stakeholders.

In my professional experience as a Web Developer, I built and maintained applications that involved payment gateway integration, subscription management, and role-based access control. These systems required precise handling of financial transactions, invoice management, and user data protection. I also developed an AI-powered financial application that processed financial data, generated PDF term sheets, and managed user authentication securely. This work gave me hands-on experience with financial workflows, data integrity, and cross-system coordination.

One area that particularly interests me is the opportunity to build and professionalize financial structures as the company grows. I am comfortable working independently, taking ownership of processes, and communicating clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my technical and organizational skills can support your backoffice operations as Therapium continues to grow.

Sincerely,

Md Shahanur Islam Shagor
