I am writing to apply for the Finance Assistant (m/w/d) in Teilzeit position at Therapium Group GmbH. While my professional background is in software engineering, I bring a strong foundation in structured data management, process organization, and digital tool proficiency that aligns well with the responsibilities of this role.

Through my work as a Web Developer, I have developed a meticulous approach to managing data, tracking information across multiple systems, and ensuring completeness and accuracy in every task. I am accustomed to working with structured workflows, maintaining organized records, and communicating clearly with different stakeholders to keep operations running smoothly.

One area where my experience directly connects to this role is in handling complex, multi-step processes that require careful attention to detail. Whether it was managing user data across distributed systems or coordinating with team members to resolve discrepancies, I have consistently applied a systematic and reliable approach to ensure nothing falls through the cracks.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills can contribute to the Therapium team as you continue to grow and professionalize your operations.

Sincerely,

Md Shahanur Islam Shagor
