I am writing to apply for the Principal AI Transformation role at KoRo Handels GmbH. Your mission to make high-quality, sustainable food products accessible through an omni-channel model is compelling, and I find the challenge of embedding AI as a core operational lever across a 350-person company genuinely interesting.

Through research and development work, I have built AI-powered systems that go beyond proof-of-concept and deliver measurable functionality. I developed an AI-powered financial application that uses OpenAI's latest models trained on custom datasets, integrates AWS Transcribe for voice-to-text conversion, and automates PDF generation and email delivery. I also built an AI-powered real estate platform that combines OpenAI assistants with Replicate API for intelligent image processing, role-based access, subscription plans, and Stripe payment integration. These projects required the same blend of strategic thinking and hands-on building that this role demands.

What stands out to me about this role is the emphasis on pragmatism over purism. I know when 80% is enough to prove a point and when to invest in doing it right. I have experience working across functions, not just within a tech team, and I communicate clearly with non-technical stakeholders. I understand how a business makes money and prioritize accordingly.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how I can help KoRo make AI the default way your teams think and work.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
