I am writing to apply for the Visiting Analyst/Associate position at Acton Capital. Your firm's long track record of investing in tech-enabled companies across Europe, combined with your focus on combining analytical rigor with empathetic intelligence, aligns closely with how I approach both technology and business evaluation.

Through my professional experience as a full-stack and AI engineer, I have built and shipped multiple internet products from the ground up. I have worked on AI-powered financial applications, real-time communication systems, and scalable e-commerce platforms. This hands-on experience gives me a practical understanding of how technology companies operate, how products are built, and what makes a business model viable beyond the surface level.

One area that particularly interests me is the intersection of AI and business models. I have developed systems using OpenAI, computer vision, and real-time data processing, which has given me direct insight into the economics, scalability challenges, and competitive dynamics of AI-enabled startups. I am comfortable evaluating both the technical architecture and the market logic behind a product.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I would welcome the opportunity to contribute to Acton's investment team and learn from your experience in growth-stage investing. I have attached my CV for your review.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
