I am writing to apply for the Werkstudent (m/w/d) Real Estate Finance & Controlling position at 10Gate. The opportunity to work directly with the senior leadership team on financial processes and strategic projects within a real estate and technology platform is particularly compelling.

My professional experience as a software engineer has given me a strong foundation in building data-driven systems. I have worked extensively with Laravel, Next.js, and MySQL to develop applications that manage complex data flows, user roles, and reporting. This technical background supports the analytical and structured thinking required for financial controlling and data quality tasks.

One area where my experience directly applies is in building and maintaining systems that handle financial transactions and user data. In previous projects, I have implemented role-based access controls, integrated payment gateways, and optimized database queries for performance. These skills translate well to supporting operational finance tasks like invoice verification, cash flow monitoring, and ensuring data accuracy in ERP systems.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and look forward to the possibility of contributing to 10Gate’s operations team.

Sincerely,

Md Shahanur Islam Shagor
