I am writing to apply for the QA Manager (m/w/d, Teilzeit) position at Oxolo GmbH. Your focus on building practical AI solutions for the construction industry and the opportunity to establish a quality foundation from the ground up align well with my approach to software development and testing.

Through my work as a full-stack developer, I have developed a strong understanding of how web and mobile applications are built, which gives me practical insight into where quality issues originate. I have experience working across the full development cycle, from requirements to deployment, and I am comfortable writing test cases that go beyond surface-level scenarios to cover real-world edge cases.

One area that particularly interests me is the emphasis on testing with actual field use cases in mind. In previous projects, I have been responsible for ensuring that features worked reliably across different platforms and environments, which required methodical test planning and close collaboration with engineering teams. I am used to writing clear, reproducible bug reports that help developers resolve issues quickly.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to building a strong quality foundation at Oxolo.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
