I am writing to apply for the SAP Consultant - S/4HANA, CRM & Customer Management position at Gratitude Jobs Ahead HR INC. Your focus on optimizing customer management processes and delivering digitalization projects in the public sector using modern SAP technologies is an area I find genuinely interesting.

My technical foundation is in full-stack development and systems engineering. I have worked extensively with PHP and Laravel, building and integrating RESTful APIs, managing relational databases like MySQL and PostgreSQL, and implementing secure authentication and role-based access control. I am comfortable working with Linux servers, Docker, Nginx, and CI/CD pipelines for deployment and maintenance.

In my professional experience as a Web Developer, I analyzed requirements, developed scalable web applications, and collaborated directly with stakeholders to deliver solutions that met business needs. I am accustomed to working methodically and independently while also contributing effectively within a team.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my background in systems development and engineering could contribute to your consulting team.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
