I am writing to apply for the Mediengestaltung / Grafikdesign position at Projektron GmbH. Your company's focus on developing the web-based project management software Projektron BCS and supporting over 820 clients across Europe is impressive. I am interested in contributing to your design team in Berlin.

My technical background includes proficiency in HTML, CSS, and JavaScript, which are listed as advantageous for this role. I have used these technologies extensively in web development projects, and I am comfortable working with design tools like Figma for creating mockups and UI layouts. This combination of design awareness and technical understanding allows me to bridge the gap between visual concepts and functional implementation.

In previous work, I have developed mockups for web applications, created responsive interfaces, and prepared visual assets for various output formats. I am experienced in maintaining consistent design standards and ensuring that visual elements align with brand guidelines. I am also comfortable researching product information and translating requirements into practical design solutions.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills can contribute to the continued success of Projektron GmbH.

Sincerely,

Md Shahanur Islam Shagor
