I am writing to express my interest in the IDMP Consultant position at Accurids GmbH. The work of building the data backbone behind life-science innovation, particularly around ISO IDMP and global data standards, is both meaningful and technically compelling.

Through my professional experience as a Web Developer, I have developed strong data-structuring capabilities. I have worked extensively with databases such as MySQL and PostgreSQL, designing schemas, optimizing queries, and translating complex data requirements into clear, standardized structures. This experience directly supports the role's need to evaluate and model customer data needs.

One area that particularly interests me is guiding organizations through standardization. In previous roles, I collaborated with stakeholders to understand their data workflows and implemented systems that improved data consistency and reliability. I am comfortable communicating technical concepts to both technical and non-technical audiences, which aligns with the advisory and change management aspects of this position.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills can contribute to Accurids' mission.

Sincerely,

Md Shahanur Islam Shagor
