I am writing to apply for the Freelance SAP FI-CA / SAP IS-U Consultant position at Pertemps ERP. While my core expertise lies in software engineering and AI systems, I bring a strong analytical mindset and hands-on experience in process optimization, system migration, and cross-functional collaboration that I believe would be valuable in supporting digital transformation initiatives for energy providers.

Through my professional experience as a Web Developer, I have worked extensively on analyzing business requirements, optimizing workflows, and building scalable solutions. I have supported migration and transformation projects where understanding existing systems, identifying inefficiencies, and implementing practical improvements were central to the work. This approach aligns well with the responsibilities outlined for this SAP IS-U and FI-CA consulting role.

One area that particularly interests me is the energy sector's ongoing digital transformation. The challenge of modernizing legacy systems while maintaining operational continuity requires both technical discipline and a clear understanding of business processes. I am accustomed to working independently on complex problems and delivering solutions that balance technical quality with practical business needs.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am available for remote freelance projects starting immediately and would welcome the opportunity to discuss how my background in system analysis, optimization, and solution delivery can contribute to your clients' energy sector projects. I have attached my CV for your review.

Sincerely,

Md Shahanur Islam Shagor
