I am writing to apply for the Online-Testkunde position at Winkler & Company. The opportunity to participate in market research studies, product tests, and user experience evaluations aligns well with my background in software development and my interest in understanding how people interact with digital products.

As a full-stack developer with experience building and testing web applications, I have developed a strong sense of what makes apps, websites, and online services intuitive and user-friendly. I regularly evaluate interfaces for usability, responsiveness, and overall user experience. This technical perspective allows me to provide detailed and constructive feedback during product testing and user studies.

I am comfortable participating in online surveys, interviews, and group discussions. I have reliable internet access and can commit to agreed study schedules. I am open to testing a wide range of products and services across different categories.

In addition to my technical background, I communicate clearly and work well in structured environments. I am fluent in Bengali and English, with working knowledge of Russian and Hindi, which allows me to contribute effectively in multilingual research settings.

I look forward to the possibility of contributing to your research projects. My CV is attached for your review.

Sincerely,

Md Shahanur Islam Shagor
