I am writing to apply for the Brand Designer Project at Twine. While my primary expertise is in software engineering and full-stack development, I have worked extensively with design tools and design systems in production environments. I understand the importance of clean, consistent branding and how it translates into functional, user-friendly interfaces.

Through my professional experience as a Web Developer, I have designed and implemented responsive UIs using Figma, Tailwind CSS, and MaterialUI. I have collaborated with design teams to translate brand guidelines into pixel-perfect components and ensured visual consistency across web and mobile platforms. This has given me a practical understanding of the design-to-development pipeline.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my background can contribute to your branding projects.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
