I am writing to apply for the Junior Go to Market Project Manager position at 1KOMMA5°. Your mission to build the energy system of the future with Heartbeat AI and transition 1.5 million households to renewable energy by 2030 is ambitious and meaningful. I want to contribute to scaling a product that directly impacts the energy transition.

Through my professional experience in software delivery and cross-functional coordination, I have developed a structured approach to managing complex workstreams. I break down GTM initiatives into clear tasks, track dependencies, and ensure that product, sales, operations, and marketing teams stay aligned. I own action items end-to-end and follow through until blockers are resolved.

I am comfortable with data and reporting. I have built dashboards and reporting cadences that consolidate launch KPIs, activation metrics, and performance data into decision-ready updates. I translate KPI developments into corrective actions and communicate them clearly to stakeholders who need concise status summaries.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am eager to bring my project management and operational skills to 1KOMMA5° and help scale Heartbeat AI to new customers. I have attached my CV for your review and look forward to the opportunity to discuss how I can contribute to your team.

Sincerely,

Md Shahanur Islam Shagor
