I am writing to apply for the E-Commerce Integration Specialist / Automotive Data Integration Specialist position at BPW Aftermarket Group Deutschland GmbH. The opportunity to work at the intersection of data systems, e-commerce platforms, and automotive aftermarket services aligns well with my technical background and interests.

Through my professional experience as a Web Developer, I have worked extensively with databases, APIs, and system integration. I have hands-on experience with MySQL for structured data management, and I am comfortable working with Linux systems for server administration, deployment, and maintenance. My work has involved building and maintaining database-driven applications, managing data transfers between systems, and ensuring reliable data flow across different platforms.

One area that particularly interests me is the challenge of connecting PIM, ERP, and webshop systems to maintain consistent and accurate data. In previous roles, I have built RESTful APIs and integrated third-party services, which required careful attention to data structure, error handling, and system reliability. I am comfortable working with structured and semi-structured data, and I approach data migration and system maintenance with a focus on stability and clarity.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my experience can contribute to your team.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
