I am writing to apply for the Projektmanager (m/w/d) Windenergie mit dem Schwerpunkt Genehmigungsverfahren position at Deutscher Bauservice GmbH. Your focus on advancing the energy transition through wind power projects across Germany is an area where I believe my technical and analytical skills can contribute meaningfully.

Through my work as a software engineer, I have developed strong capabilities in data analysis, process coordination, and structured problem-solving. I am experienced in evaluating measurement data, creating forecasts, and developing systematic methods to improve project outcomes. These skills translate directly to the responsibilities of coordinating approval processes, preparing energy yield prognoses, and supporting the development of efficient workflows.

One area that particularly interests me is the coordination between multiple stakeholders and external consultants during complex project phases. In my professional experience, I have regularly collaborated with cross-functional teams, managed communication between technical and non-technical parties, and ensured that project milestones were met on schedule. This has given me a practical understanding of how to manage approval-related workflows and maintain clear documentation.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am confident that my analytical mindset, structured approach, and experience in coordinating technical projects make me a strong candidate for this role. I have attached my CV for your review and look forward to the opportunity to discuss how I can support your wind energy projects.

Sincerely,

Md Shahanur Islam Shagor
