I am writing to apply for the Technischer Senior Projektleiter position at sandan AI. Your focus on building practical AI solutions that integrate into real business processes aligns with my own approach to software engineering and project delivery.

Through my professional experience in full-stack development and AI engineering, I have developed a solid understanding of APIs, data flows, cloud systems, and modern software architecture. I have worked extensively with JavaScript, TypeScript, Python, and SQL, and I am comfortable discussing technical decisions with engineering teams without needing to write production code daily. This technical grounding allows me to translate complex requirements into clear project plans and actionable work packages.

In previous roles, I have led customer-facing projects from concept to deployment, coordinating developers, designers, and external stakeholders. I have conducted requirement analysis, facilitated technical discussions, and maintained clear documentation throughout the project lifecycle. I am experienced with agile workflows, ticketing systems, and managing timelines, budgets, and risks pragmatically. I also have hands-on experience integrating AI assistants and automation into real-world applications, which directly supports sandan AI’s mission of turning AI concepts into reliable, usable solutions.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am interested in contributing to sandan AI’s growing portfolio of AI projects and helping shape how companies use AI productively. I have attached my CV and relevant project examples for your review.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
