I am writing to apply for the Senior Amazon Advertising Manager position at ADDVANCE Consumer Health Group GmbH. Your company's focus on health and wellbeing products through brands like Achterhof, BodyLab, and Gymqueen is impressive, and I am interested in contributing to your marketplace advertising strategies.

My professional background is in software engineering, where I have developed strong analytical and strategic thinking skills. I have experience building dashboards and monitoring systems that track key performance indicators, which directly relates to the KPI monitoring and optimization responsibilities outlined in this role.

In previous work, I have designed and implemented real-time monitoring dashboards that track system health, availability, and latency metrics. This experience has given me a solid foundation in data analysis, reporting, and deriving actionable insights from performance data, skills that are essential for managing Amazon advertising campaigns and optimizing ROAS, ACoS, and TACoS.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my analytical approach and technical background can support your advertising goals.

Sincerely,

Md Shahanur Islam Shagor
