I am writing to apply for the Senior Creative (m/w/d) role at gocomo GmbH. The position combines concept development, AI-driven ideation, and hands-on production, which aligns with my experience building intelligent systems and collaborating across teams.

Through my work as a Full-Stack and AI Engineer, I have used AI tools regularly for ideation and content generation. I have integrated OpenAI and Replicate APIs into real-world applications, and I use Figma for prototyping, moodboards, and storyboarding to align creative direction before development begins. I understand how to move from concept to execution efficiently.

One area that particularly interests me is using data and AI to shape creative decisions. In my projects, I have worked with real-time data pipelines and performance metrics to guide feature development. I am comfortable testing ideas, iterating based on feedback, and optimizing for measurable outcomes.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background can contribute to gocomo’s creative team.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
