I am writing to apply for the Senior Product Marketing Manager (m|w|d) B2B SaaS & Go-to-Market position at idealo internet GmbH. Your focus on shaping how B2B products are understood, positioned, and sold resonates with my experience building and delivering SaaS platforms where technical depth and market clarity must work together.

idealo operates at the intersection of marketplace technology and consumer trust, which is an environment I find genuinely interesting. The challenge of translating complex product capabilities into clear customer value is something I have navigated directly in my work.

In my professional experience as a Web Developer at Explo-IT, I worked at the interface of product management, engineering, and business stakeholders. I designed and developed scalable web applications using Laravel and Next.js, built and integrated RESTful APIs, and implemented authentication, role-based access control, and payment gateways. This required me to understand not only the technical architecture but also how each feature would be perceived and adopted by end users. I contributed to product launches and feature rollouts, ensuring that technical decisions aligned with market needs.

One area that particularly interests me is the development of sales enablement materials and messaging frameworks. In my previous role, I created documentation and collaborated on knowledge-sharing sessions that helped both technical and non-technical teams understand product capabilities. I also optimized application performance through query tuning and caching strategies, which directly improved user experience and adoption metrics. This hands-on approach to measuring and improving product performance aligns with your focus on pipeline quality, conversion rates, and feature adoption.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
