I am writing to express my interest in the Gestaltungsberater fˆ…r Restrukturierung und Unternehmensnachfolge position at AWP Wirtschaftstreuhand GmbH within the LKC network. Your focus on digital and efficient processes, combined with a personal and collaborative work environment, is particularly appealing.

While my professional background is in software engineering rather than tax or legal consulting, I bring strong analytical and problem-solving skills developed through years of building complex systems. My experience in designing scalable architectures, optimizing databases, and implementing secure authentication systems has trained me to understand intricate requirements and deliver structured, reliable solutions.

In my professional experience as a Web Developer, I worked on full-stack applications using Laravel, Next.js, and React. I built RESTful APIs, implemented role-based access control, integrated payment gateways, and optimized database performance through query tuning and caching strategies. These projects required careful planning, attention to detail, and the ability to translate business needs into functional systems.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
