I am writing to apply for the IT-Systemadministrator position at RKT Rettungsdienst gGmbH. Your work in building the largest telemedicine emergency physician center in Germany is genuinely impressive, and I am interested in contributing to the IT infrastructure that supports this innovative healthcare service.

Through my professional experience, I have developed strong skills in Linux server administration, including managing Nginx and Apache web servers, containerizing applications with Docker, and setting up CI/CD pipelines for reliable deployments. I have worked with backup and recovery processes, monitored system health using Prometheus and Grafana, and maintained secure server environments.

One area that particularly interests me is IT security and compliance. I have practical experience implementing authentication systems, role-based access control, and secure communication protocols. I understand the importance of documentation, process optimization, and adhering to security standards in production environments.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my background in system administration and IT security can support the Telenotarzt operations at RKT Rettungsdienst.

Sincerely,

Md Shahanur Islam Shagor
