I am writing to apply for the Business Controller (m/w/d) position at SafeDriver Group GmbH. Ennoo Rental's work in scaling fleet and rental models in the car rental industry is an interesting domain, and I appreciate the opportunity to contribute to a growing finance team.

My professional experience has involved building data-driven systems and reporting structures for web applications. I have worked with databases such as MySQL and PostgreSQL to track key metrics, and I have used monitoring tools like Grafana and Prometheus to visualize performance data. This has given me a practical understanding of how to structure KPIs, monitor trends, and report variances to stakeholders.

One area that particularly interests me is the hands-on nature of this role. In previous work, I have optimized workflows between development and operations teams, improving data quality and streamlining reporting processes. I am comfortable working independently to build reporting structures from the ground up and collaborating closely with management to ensure transparency.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my analytical and process-oriented approach can support the finance team at SafeDriver Group.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
