I am writing to apply for the Praktikum Automatisierungen & Low-Code position at GOVORA. Your mission to automate public administration processes with AI is exactly the kind of challenge I want to be part of, and I appreciate that this role offers real responsibility from day one.

Through hands-on project development, I have built a strong foundation in JavaScript and Python, which directly supports the low-code and automation work described in this role. I have experience designing and integrating RESTful APIs, working with webhooks, and connecting systems to move data seamlessly between services. I am comfortable with logical problem-solving and breaking down manual processes into structured, automated workflows.

One area that particularly interests me is the integration of LLMs into automation chains. In my project work, I have used OpenAI APIs to build AI-powered features, including training assistants and processing unstructured data. I am confident I can contribute to developing prompts and automation pipelines for handling complex administrative data.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how I can contribute to GOVORA’s growth and help scale your automation efforts.

Sincerely,

Md Shahanur Islam Shagor
