I am writing to apply for the Pharmazeutisch kaufmˆnnische Assistenten (50%) fˆ…r Debitoren Buchhaltung position at KˆNIG Gesellschaft fˆ…r Image- & Dokumentenverarbeitung mbH. Your company's focus on optimizing IT services in the e-health sector, particularly in prescription processing and billing, is an area where I believe my technical and analytical skills can contribute.

Although my professional background is in software engineering, I have developed strong IT skills and a disciplined approach to data management and process optimization. In my previous roles, I worked extensively with databases, financial transactions, and automated workflows, which has given me a solid foundation for handling accounts receivable, reconciling accounts, and managing payment processes.

One area that particularly interests me is the opportunity to collaborate on the further development of billing software. My experience building and maintaining web applications, including payment gateway integration and role-based access control, has prepared me to contribute meaningfully to software improvements in a healthcare billing context.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and look forward to the possibility of discussing how my skills can support your team.

Sincerely,

Md Shahanur Islam Shagor
